

ACVS

## Comprehensive Approach to the Obstructed Small Animal Ureter

October 11, 2017

8:00 AM - 5:00 PM

ACVS Surgery Summit  
Indianapolis, IN

Sponsored by Infiniti Medical

\*\*\*Available to ACVS and ECVS Diplomates  
and residents only

Participants will receive expert instruction in the decision-making, surgical, endoscopic, and fluoroscopic skills required to provide comprehensive treatment for the varied obstructive conditions of the canine and feline ureter. Instruction will focus on the surgical approach to ureteral obstruction using magnification, techniques for endourologic and fluoroscopic placement of ureteral stents, and techniques for performing subcutaneous ureteral bypass.

Instructors will review the indications for each technique and required knowledge and skill set for proper application and performance. Participants will then rotate through three stations, spending 2–3 hours per station practicing the techniques on cadaver specimens, models, and lifelike bio-tissues evaluated as teaching models.

- The surgical station will offer instruction on use of the operating microscope, loupes, and the Storz Vitom unit, micro-instruments, and micro-suture required for ureterotomy or ureteral reimplantation.
- The stenting station will offer instruction in cystoscopic and fluoroscopic equipment and accurate placement of ureteral stents.
- The ureteral bypass station will offer instruction on the accurate placement of subcutaneous ureteral bypass (SUB) units using models and feline cadaveric specimens.

Participants will receive hands-on instruction and will have an opportunity for one-on-one instruction and skills assessment. To conclude each morning and afternoon session of the laboratory, there will be opportunity for interactive discussions on difficult cases of small animal ureteral obstruction to consider which techniques or combination of techniques might be most indicated.

**Instructors:** Lillian Aronson, VMD, DACVS, Allyson Berent DVM, DACVIM,  
Heidi Phillips, VMD, DACSV-SA, Chick Weisse VMD, DACVS

**Course Fee:** \$1,350 early / \$1,400 late

*Spaces Limited*
