**COMPREHENSIVE APPROACH TO THE OBSTRUCTED
SMALL ANIMAL URETER**

Join us Wednesday, October 24, 8:00am–5:00pm

Laboratory Chair: *Heidi Phillips, VMD, DACVS-SA*

Laboratory Faculty: *Allyson C. Berent, DVM, DACVIM, Chad W. Schmiedt, DVM, DACVS-SA,
Chick Weisse, VMD, DACVS*

Open to ACVS and ECVS Diplomates and residents only

Participants will receive expert instruction in the decision-making, surgical, endoscopic, and fluoroscopic skills required to provide comprehensive treatment for the varied obstructive conditions of the canine and feline ureter. Instruction will focus on the surgical approach to ureteral obstruction using magnification, techniques for endourologic and fluoroscopic placement of ureteral stents, and techniques for performing subcutaneous ureteral bypass.
